

To have your image titles or captions displayed when they're posted to Facebook.

The image shows a side-by-side comparison of a photo's metadata and its appearance on Facebook. On the left, a metadata editor window for the file '02 - Autograph Tree seed pods on rock - Clusia Rosea.jpg' is shown. The 'Description' tab is active, and the following fields are filled in: Document Title: 'Autograph Tree seed pod', Author: 'Jared Ikeda', and Description: 'Autograph Tree seed pods on rock - Clusia rosea'. A red circle highlights these three fields, with a red arrow pointing from the circle to the Facebook post on the right. The Facebook post, from the 'Padre Trails Camera Club' page, displays the photo with the text 'Autograph Tree seed pod' and 'Autograph Tree seed pods on rock - Clusia rosea' overlaid on it. The photo itself has a watermark 'Jared Ikeda' in the bottom left corner. The Facebook interface shows the post was published by Ken Jones on August 5.

Your captions or titles have to appear as shown in the image metadata. Either one will do. This example had both fields filled in and they both are displayed by Facebook.
