

A simple matting method

1 Get the parts together

Inside backing material.
Can be mat board, foam core or a variety of other materials.
A web search will yield volumes.

Acid-free archival tape*

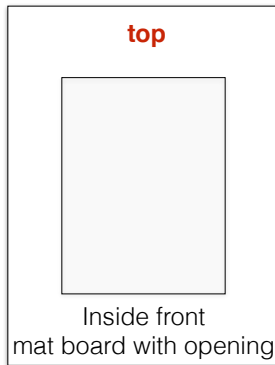

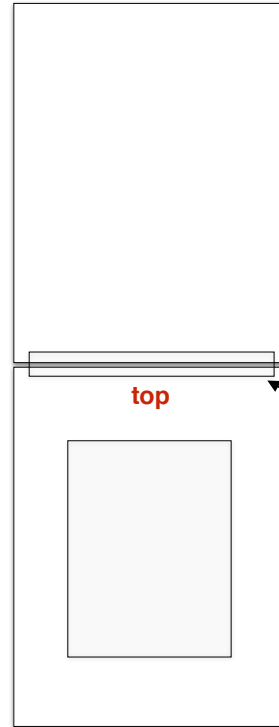

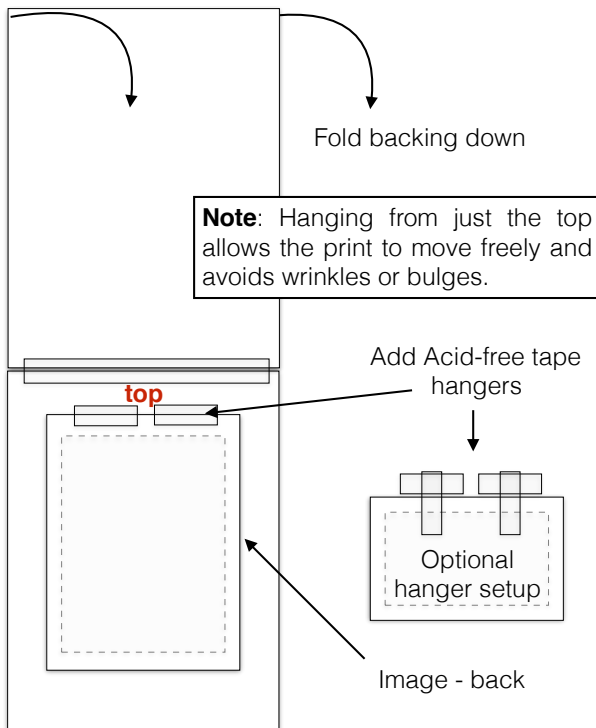

Image to be mated

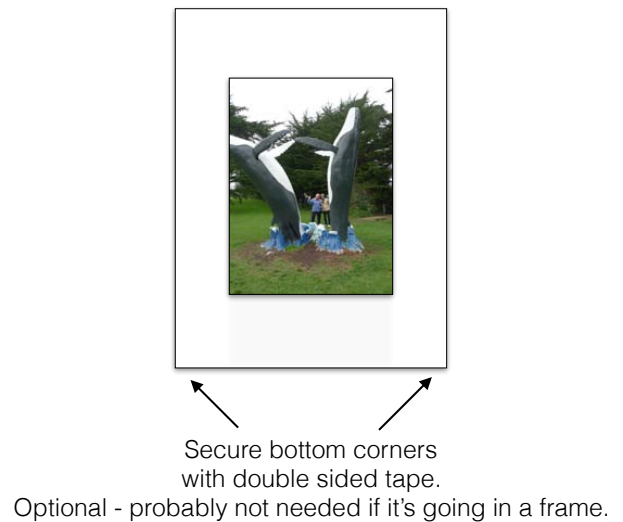

2 Add a top hinge

3 Attach print and close

4 Ready for framing

***Note:** Acid-free or Archival Tape is a tape that will not yellow or degrade over time, and that contains an archival adhesive, an adhesive that is reversible and will not damage a document or surface. Available online or at most art supply outlets.
