

PTCC-2017 – CREATIVE GROUP AA

3 images from 1 member

01 - Psychedelic Pattern 352 .jpg

Since I have no idea how this image was made, I can't really appreciate the work involved. I'm curious. What is the technique? The image does deliver on its title. Psychedelic in pattern and colors.

02 - Space Vortex Gamma.jpg

I like the mystery and movement in this image, particularly the wispy light trails. The central symmetry gives a tranquil core, but the light trails lend great energy to the image, like explosions on the surface of a mandala-like sun.

03 - The Starry eyes.jpg

Reminiscent of a renaissance painting, this image is a wonderful combination of mystery and direct (stark) connection. The viewer is completely drawn in to the woman's gaze. The palette; flowing, swirling movement; and textures of fabric and skin show the photographer's skill in constructing a shot ... and a story ... one that can have many interpretations by the viewer.

Winning Image:
