

# Pop up for the Month of August

## ~ Depth of Field ~

Depth of field is the area of a photo that's in focus. More technically, it's the distance between the closest and farthest objects that still appear acceptably sharp in a photo. Being able to control the depth of field allows you to direct the viewer's eye where you want it. You can have a shallow depth of field or a large depth of field.

Share up to 5 of your favorite images with different depth of fields by August 31st, for a showing on September 4th.

Send your images to: [rljmonterey@comcast.net](mailto:rljmonterey@comcast.net)
