

## **PTCC-2019 – NATURE #1**

GROUP AA

*3 images from 1 member*

---

### **1 - Great White Egret.jpg**

*This is a lovely picture. There is nothing particularly special about the egret itself, but the composition, shallow depth of field, contrast between egret and its surroundings are all very effective.*

### **2 - Long Billed Curlew.jpg**

*This is an extraordinary capture, really a once-in-a-lifetime shot, and the composition is perfect. A little adjustment in Photoshop, which according to my understanding of the rules is permitted, would make a world of difference. I'm attaching a rough idea of what I'm talking about.*

### **3- Wetland Shore Bird.jpg**

*Beautiful picture, technically perfect. I find the out-of-focus plant on the right side distracting, but according to the rules, there's not much you could do about it – certainly cropping is not an option...*
