01-Bubble-Net Feeding.jpg

Patricia McKean

Great photo from a special perspective (drone?) The gulls add the second image for the “creative” criteria. Well exposed.

02-Culture - Then and Now.jpg

David Thon

Creative juxtaposition consistent with the title. Good mapping of sculpture onto windows, matches the curve of the building. Good use of color to separate the images.

03-Monarch Butterflies Visit Waxing Crescent Moon.jpg

Clarissa Conn

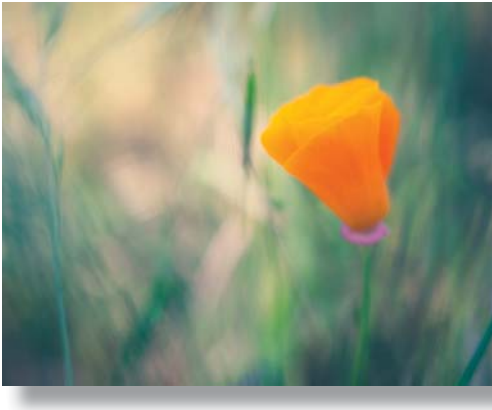

Very imaginative and memorable. Good color and good diagonal composition. Well Done

04-Spring Welcome.jpg

David Thon

Good composition with a real sense of space with diagonal path to door. Great texture throughout, very painterly.

05-Velvet Poppy.jpg

Patricia McKean

Pleasing colors and composition, good use of rule of thirds.

06-Ethereal Light over Haifa Israel.jpg

Rick Thau

Great sky, would like to see more of the city, even though its actually in shadow at sunset.

07-Ominous forboading skys over military cemetary.jpg

Rick Thau

Another great sky, though might be more powerful if building were smaller so there was more sky. In "creative" a more forced perspective on the building and grounds might make it more dramatic.
